

CHAIN CONVEYORS

Chain conveyors

Chain conveyors transport floury, grainy and lumpy bulk materials horizontally or on a slight upward incline. Chain conveyors can also be used as receiving chain conveyors and for silo discharge.

Starting with our standard modular-system we adapt the chain conveyor to the product properties, the installation option and the process requirements.

You can choose between our two designs below. The standard design with a lot of accessories and our special design for smaller capacities with low carry over and low dead space.
